ATTENTION: Every attempt must be made to remove remaining chemistry and fluid from a heater before sending to Trebor for analysis. Failure to rinse and evacuate residual fluid from the heater per the instructions given below will result in an additional charge of \$500 which will be applied to the evaluation fee.

Return Data Sheet, Heater

Complete this form in its entirety and EMAIL to Treborservice@idexcorp.com or FAX to (801) 255-2312 prior to shipment. We may request a Material Safety Data Sheet for the application chemical.

Company Name:			
Completed By:	Title:	Phone #:	
Chemical / Fluid Processed:			
Method used to clean: (recommend 15 minute rinse with DI water)			
Additional Information			
Symptoms of failure:			
Maximum Operating Temperature:			

Product Preparation, Handling and Shipment:

These instructions are to ensure the safety of our personnel when handling Trebor products that have been returned. Your cooperation is appreciated.

- Product must be rinsed thoroughly with DI water if it has been in direct contact with chemistry. Cycle with DI water for 30 minutes; or if a pump is not available, force DI water through the inlet port and allow to continually drain for 30 minutes (NOTE: use caution in handling fluids). Evacuate any standing liquid / fluid.
- Remove any and all accessories, fittings or attachments that are not part of the Trebor product.
- Double-bag the product and package it to prevent damage during shipment.
- Enclose the completed return data sheet with shipping documentation (packing slip).
